Software Developer — vishal.rathore8oct@gmail.com — +91-7464942360
vishalrathore.hashnode.dev — linkedin.com/in/vishalrathore8oct — github.com/vishalrathore8oct

Summary

Motivated Software developer with expertise in HTML, CSS, JavaScript, and backend skills in ExpressJS and MongoDB. Focused on building user-friendly applications and gaining experience in full-stack development. Strong problem-solving abilities with hands-on project experience.

Skills

- HTML, CSS, JavaScript, Python
- Git, GitHub
- MongoDB, Mongoose, ExpressJS, NodeJS
- Bootstrap, Tailwind CSS
- Telegraf Library, Linux CLI
- Operating Systems: Ubuntu, Windows

Projects

Telegram Quiz Bot

Developed a Telegram bot for interactive quizzes with category selection, progress tracking, and feedback. Built with Node.js, Telegraf, and MongoDB.

[GitHub Repository](#) — [Demo Video](#)

Task Management App Using LocalStorage

Built a dynamic to-do list app using `localStorage` for data persistence. Allows users to add, edit, delete, and filter tasks by priority, due date, and status.

[GitHub Repository](#) — [Live Demo](#)

To-Do List Backend with Authentication

Created a backend for a to-do app using ExpressJS, MongoDB, and JWT authentication. Users can securely create, read, update, and delete tasks.

[GitHub Repository](#)

Two-Player Trivia Quiz Game

Developed a multiplayer trivia quiz game with real-time feedback, scoring, and a variety of categories and difficulty levels.

[GitHub Repository](#) — [Live Demo](#)

Weather App Using Fetch API

Built a weather app that fetches real-time data from OpenWeatherMap API to display current weather and 5-day forecast.
